Henrik Klasen is a Bachelor in Computer Science student at the University of Luxembourg. He wants to apply to a spot in the "Master in Information and Computer Engineering'-Program. My volunteering work started in early April 2023, when I joined the network. With pursuing the Master in Information and Computer Engineering, I hope to gain valuable insights into the current state of the art in System and Computer Design and Architectures. "I learned to solve complex problems in a time constrained setting" "I participated in competitions in Informatics, Physics and Page 2 Mathematics" "In the competitions for Mathematics and Physics I achieved a second place" Luxembourg University has a master program combining Computer Science and Engineering. During his Erasmus at the University of Technology in Vienna, I was exposed to a quite international environment. This is nothing unusual for me, as our University in Luxembourg has about 50% international students. Henrik Klasen is studying Information and Computer Engineering in Graz, Austria. Graz has a University of Technology, and about two months ago he found the Master program. He would hope for a chance to pursue his Master.
